

The Erasmus+ project IBM MORE is coming to an end

The EU funded project will reach the end of its lifecycle in August 2021 after developing materials aimed to strengthen European key competences through applications to boost the entrepreneurial spirit of migrants

IBM MORE is an **Erasmus + KA2 funded project**. The project will finish, after two years, in August 2021. It involves four organisations from Belgium, Austria, Norway and Spain.

IBM-MORE project aims to support VET teachers and trainers with innovative tools and methods to **stimulate the innovation, digital, intercultural and entrepreneurship competencies of VET learners** through gamification.

The partnership of IBM MORE has developed an **Online Digital Database** of good practices and intercultural resources for Migrant Entrepreneurs, as well as a set of **APPs & Training** designed to improve the selected European Key Competencies for migrant entrepreneurs and the **IBM-MORE pedagogical handbook**, as a practical tool for VET educators and trainers working with migrants in innovative entrepreneurship learning methods.

The project methodologies and outputs have been tested and successfully evaluated during the piloting phase carried out in the participant countries. What's more, the **IBM MORE aims, outputs and results** were detailed explained during the international final conference held online in June 2021.
