

About the project

IBM MORE, International Business Mediator: Matching Opportunities with Resources for Entrepreneurs, aims to support VET teachers and trainers with innovative tools and methods to stimulate innovation, digital, intercultural and entrepreneurship competences of VET learners through Apps—based learning.

IBM MORE explores a wider understanding of refugee integration as a means of participatory community development in the Social and Solidarity Economy sector. Capacity-building in the receiving communities is not merely a pooling of professional knowledge and resources, but an empowerment of the whole receiving community and third-country nationals to build a strong community that considers both the needs of newcomers and of locals.

Four partners from **Austria, Belgium, Norway and Spain** -with strong expertise in entrepreneurship education migrant integration, and VET systems- will work together developing the following **project results**:

- **Online Digital Database** of good practices and intercultural resources for Migrant Entrepreneurs (based on needs framework identified through **comparative analysis**)
- Conceptualization and creation of **training curriculum** based on European Key Competencies (EKC) on digital training platform for learning via APPs
- IBM-MORE **pedagogical handbook** for transferability in a European context

NEWS

Second meeting in Valladolid, Spain

The consortium met in the premises of INFODEF, in February 2020, to make an update of the work carried out so far.

- The **Online Digital Database** will soon be translated on every partner's language and on English.
- The **Training Curriculum** is now on development stages.

Virtual meetings

The third transnational meeting has been postponed due to Covid-19 crisis. Nevertheless, the consortium has been meeting online periodically to ensure the workflow.

During these meetings the partners reviewed the project management, development of intellectual outputs, dissemination and quality assurance.
