

About the project

IBM MORE, International Business Mediator: Matching Opportunities with Resources for Entrepreneurs, aims to support VET teachers and trainers with innovative tools and methods to stimulate innovation, digital, intercultural and entrepreneurship competences of VET learners through Apps—based learning.

IBM MORE explores a wider understanding of refugee integration as a means of participatory community development in the Social and Solidarity Economy sector. Capacity-building in the receiving communities is not merely a pooling of professional knowledge and resources, but an empowerment of the whole receiving community and third-country nationals to build a strong community that considers both the needs of newcomers and of locals.

Four partners from **Austria, Belgium, Norway and Spain** -with strong expertise in entrepreneurship education migrant integration, and VET systems- will work together developing the following **project results**:

- **Online Digital Database** of good practices and intercultural resources for Migrant Entrepreneurs (based on needs framework identified through **comparative analysis**)
- Conceptualization and creation of **training curriculum** based on European Key Competencies (EKC) on digital training platform for learning via APPs
- IBM-MORE **pedagogical handbook** for transferability in a European context

NEWS

The project is coming to an end!

The consortium has almost finished all the intellectual outputs that will be available on the website:

- The **Online Digital Database** will soon be available in English, Norwegian, French, German and Spanish
- The **Apps Training Curriculum** has been a success and soon, all the users will be able to access them!
- The **Pedagogical Handbook** is now incorporating each partner learnings from the IBM MORE project.

Virtual meetings

The partnership has been meeting virtually since the COVID19 pandemic started.

During these meetings the partners have worked on the project management, developing the intellectual outputs and keeping up with the dissemination and assuring the overall quality.
